

## FURNITURE COAT HANGERS

Any object, however mundane can be transformed with a little thought and innovative design approach. And, it seems, that the humble coat hanger is getting a thoroughly modern make over. With living space shrinking every little detail counts and so coat hangers need to work on aesthetic as well as practical levels.

What's great about these new designs is the sense of playfulness. The process of hanging up your coat may not fill you with excitement but many of these designs want to raise a smile. Colour too is strong and sassy, making a big statement for halls, which, so often, can be dull and unexciting.

Casamania is well ahead with its fun filled designs in colours that pack a serious punch, then there's British design house Domesticity, with a little garden shed design that also provides space for key storage. Then there's Italian design house Bonaldo, which has a bold Tree design, the perfect irreverent coat hanger or even Diamantini & Domeniconi's charming multipurpose clock and hanger and Conecon's sweet coat hanger design. All in all there's plenty of mileage left in this trend so expect to see over lavish riffs on coat hangers to come. ■■■
