

CASAMANIA

Casamania sells sunshine. Didn't you know?

>

Call me: SOS

Who: Josh Owen

What: Multifunctional stool. Created for relaxed, convivial moments. The two elements attached to the seat can be used as cup holders, handles (tray) or hooks. Turned upside-down, it becomes a fun and unusual vase or container. Created in mass-colored polyethylene (white, black, blue, light brown, orange), it's suitable for both indoor and outdoor use.

Why: "I've always been interested in small stools. Commonly considered less desirable than chairs as a study object for designers, they are a seating category often overlooked".

How: Now synonymous with a distress signal, S.O.S. began as a naval term meaning 'Save Our Ship'. Like a life-raft, the SOS stool is a floating island of utility that extends beyond the parameters of what we consider a temporary seat.
